

HOME HELPERS® HOME CARE LAUNCHES CARED-4SM

Home Helpers Home Care launches their new program Cared-4, which is aimed at helping clinicians decrease hospital admissions and readmissions.

Four Factors Lead to Geriatric Hospital Admissions and Readmissions

Extensive research conducted by both the Centers for Medicare Services and the National Center for Biotechnology Information (NCBI) shows the contributing factors associated with geriatric hospitalizations. These break down into 4 key areas.

1. **Improper adherence** to medical professionals' treatment plans and follow-up care
2. **Improper nutrition** – this includes the compliance of dietary adjustments as well as dehydration
3. Medication compliance
4. **Social determinants health** - where people live, work, their mode of transportation

These 4 factors were the inspiration for Home Helpers Home Care's new Cared-4 Program. Cared-4 can improve healthcare compliance by integrating additional services into a patient's care plan. Including:

Personal Care and Companionship

Customized care from helpful, compassionate Caregivers

Wellness Calls

Scheduled check-ins throughout the day and week

Safety and 24-Hour Monitoring

Ensuring safety around the clock with 24/7 response

Nutrition and Well-Being

Balanced meals, physical health and mental engagement

Cared-4SM

Home Helpers®

“Our goal at Home Helpers has always been the same, helping people remain independent at home as long as they choose. Cared-4 is a natural progression of the care we’ve provided for decades, combined with our desire to lead the industry in being a strategic partner in the healthcare continuum of care,” shared Emma Dickison, CEO of Home Helpers.

“Cared-4 is the most comprehensive care program in the in-home industry, allowing us to truly provide the right level of service at any point in a patient’s care. It also provides patients with support in the 4 contributing factors to hospitalizations,” continued Dickison.

As a healthcare professional, you can connect your patients with Home Helpers. Our intake specialists will help design a customized care plan taking into account follow-up appointments, nutrition, hydration, medication compliance as well as social engagement.
